

## Prolyte Group at Prolight + Sound Frankfurt

Leek, 7 March 2018- Showing its unrivalled capacity in the design and build of complex truss structures Prolyte Group will not only bring a range of heavy duty truss systems to the Prolight + Sound exhibition in Frankfurt, but also a range of trusses specially designed for LED walls. Next to these, Prolyte will show more innovative new products. The Prolyte team is looking forward to connect with its existing and new customers.

Prolyte Group is located in hall 3.0 stand E14.

### Product news

Please find below a sneak preview of the products Prolyte Group will present at the Prolyte + Sound.

### Introducing the Mammoth Ground support system

The massive Mammoth M145RV truss can now be combined with a complete ground support system, consisting of a special designed base section, top section, D75T tower and sleeve block to accommodate heavy loading €

### Universal LED solutions

Prolyte will introduce a range of products to facilitate the safe erection or suspension of LED walls. The LSU series offers a universal LED stack system suitable to build LED walls of different manufacturers. All systems offer sound constructive solutions and user safety.

The LSU series also comprises 3 solutions to suspend your LED system ; H40V-MB, S52SV-MB and the H40R truss all compatible with the regular truss series.

### **Extending the successful BRG70 range**

The BGR70 truss is in essence a low volume truss with extreme load bearing capacity. The truss can handle large spans as well as extreme loads. Prolyte has designed a special adapter to combine this truss with a B100 Sleeveblock and CT tower, facilitating the combination of BGR70 truss in ground support systems.

### **Introducing the BOX-40V-HD**

After introducing the BOX-30V-HD in 2017, Prolyte now extends this range with the BOX-40V-HD. This box corner is a fully plated and bolted element and therefore is much stronger than the regular box corner. This allows you to build any 2D or 3D structures without losing involuntary strength due to the corner types used.

### **StageDex**

The StageDex support frames range will be extended with the Easy Frame D system. A quick and easy solution to build your stage support or raised floor. The Easy Frame D can be build on various, adjustable heights, ranging from 110 to 150cm height and is calculated to hold 500kg/m<sup>2</sup> loading.

### **ProLyft**

ProLyft will show a complete set up of hoists and controls, showing the endless possibilities ProLyft can create for the basic to advanced user requirements.

### **Events**

#### **Prolyte Party**

12 April Prolyte will host a stand party on Thursday 12 April. Please feel invited to join this event from 18:00 hours onwards. We'll hope you'll tune in for our party with live music.

#### **Manufacturers Forum**

Wednesday 11 – 04, 15:00 – 16:00 Manufacturers Forum, Halle 3, Ebene Via, Raum Facette

Eric Laanstra; LED screen rigging – risk factor or professional approach?

### **Meetings**

Prolyte has designated a special meeting area in their stand for customers. Please contact your dedicated account manager if you like to meet someone of the Prolyte team, so we can plan in advance.

We look forward to see you.
