PROLYTE new products at PLASA

H40U Pre-rig

Developed for professionals who need to quickly install medium-sized lights, LED walls, curtains, or a combination of these. This compact pre-rig features a unique Verto connection that protects your lighting against flying pins when disconnecting the truss. It offers a smart new option for demanding event and installation applications.

LSU Outdoor

Building on the flexible modular LSU concept, the new LSU Outdoor provides reliable ground support for outdoor LED screens. Designed for stability and safety, it can reach four metres high and is verified to the latest applicable standards.

Its modular configuration creates a strong, rigid structure that adapts easily to different screen sizes and event requirements.
