

Prolyte StageDex for CS Productionz

Posted on October 11, 2023

Clyde Shunmugam of CS Productionz

CS Productionz, a company that specialises in conferences, corporate productions and exclusive events, has expanded its equipment inventory to accommodate its busy schedule. With offices in both Durban and Johannesburg, the company recently made an investment in Prolyte StageDex and a Beavis II 32A 3-Phase Distro from DWR Distribution.

Clyde Shunmugam initially founded the technical supply company back in 2009 in Durban, and the opportunity to continuously meet new people and to learn from other industry professionals to fine tune his own service has kept him passionate. He playfully hints that the delectable cuisine offered at every event is undeniably an added perk!

Prolyte StageDex for CS Productionz

The company's initial purchase from DWR included Prolyte totem truss pieces and Clyde is delighted to now expand his offerings with the addition of ten black coated StageDex (2m x 1m) and ten deck clamps. "All the larger AV companies use Prolyte and when I did my research I was convinced that Prolyte was the brand that would help me reach a larger clientele. I believe it also gives clients peace of mind knowing I use industry standard gear."

StageDex can be qualified as the best and most versatile staging system available. The StageDex BasicLine is a high quality, lightweight deck for indoor use with a maximum loading capacity of 750kg/m².

In closing, Clyde commends the staff at DWR as a significant factor in choosing Prolyte. "Marlene Riley was my first sales consultant and was amazing and helped me so much when I setup my Johannesburg branch. Motlotlo Mac Makhobotloane (aka Mac) has also been excellent.... I asked a lot of questions but he kept calm and answered everything. Thank you to the team at DWR for the exceptional service."
