

Prolyte to exhibit at Mediatech

The Verto truss is a revolutionary system, making truss connection fast, silent and safe.

Prolyte, the leading manufacturer of trussing, staging, electrical hoists and outdoor stage construction, looks forward to meeting up with existing and new customers at Mediatech, booth C25, to be held at the Ticketpro Dome in Johannesburg from 17 to 19 July.

Visit the Prolyte stand to view some of the most innovative entertainment solutions, including the game-changing Verto truss and the LSU system for supporting LED Systems in a safe way. Meet also Paul Hadfield and John Postma from Prolyte to get more information.

DWR Distribution is the official Prolyte distributors in South Africa and looks forward to working alongside the Prolyte team.

Verto Truss

The Verto truss is a revolutionary system, making truss connection fast, silent and safe. The Verto truss brings a totally new perspective on truss assembly. This truss can greatly benefit the daily working practice for technicians; its tool-less connection is almost completely silent, thereby significantly adding to safety on the work floor.

Tested general sound levels are around 55dB, where a conical truss system generates a sound level of 80dB during assembly. Furthermore, it reduces assembly and disassembly time. Tested general assembly times are up to 5 times faster than those for truss with conical coupling systems and 10 times faster than any bolted truss.

Universal LED Stack System

Universal LED Stack System

The LSU series is a range of products to facilitate the safe erection or suspension of LED systems. The LSU series offers solutions for either suspending your LED systems or building LED systems from ground level.

The LSU series comprises of three solutions to suspend your LED system: H40R, H40V-MB, S52SV-MB. The trusses with middle beam are both compatible with the regular truss series and one universal solution to build LED walls of different manufacturers, the LED Stack system. All systems offer sound constructive solutions and user safety.

ProLyft Aetos Hoist Range

Verto Truss

Image not found or type unknown

The ProLyft Aetos range of entertainment hoists is fully equipped to meet future demands in lifting equipment and offers smart features and carefully engineered product attributes. It comprises standard 250kg, 500kg, and 1000kg hoists and controls. Every hoist is equipped with limit switches and has a fixed speed of 4-meters per minute. The Aetos has a specially designed disentangle plate for optimal chain feeding; this reduces 90% of locking chains.
