

Rigging Safety by Robert Izzett @ Mediatech

Posted on July 12, 2019

Robert Izzett from DWR Distribution will cover some of the basics that are often overlooked when

calculating loads on trussing in a practical way. The consequences of getting these calculations wrong can be costly in both material and sadly sometimes in lives. He will show what happens when we get the calculations wrong - The results are spectacular and seeing them happen in front of you leaves a lasting impression!

You are welcome to join Robert at Mediatech Africa 2019 at the following sessions:

17 July 14:30 - 15:30 Presentation Zone 2

19 July 14:30 - 15:30 Presentation Zone 3

Entry is free of charge.
