

## Robe launches Robin range

02 April 2009

### Robe Launches new Robin moving light range at Prolight + Sound 2009

Robe lighting launches it's amazing new Robin (**Robe Innovative Concept**) range of moving light products at Prolight+Sound Frankfurt.

Robe will once again have a colourful, beautifully designed, highly visual and welcoming booth D59 in the middle of Hall 9, as well as running an active demonstration area away from the booth. This will offer the opportunity to show the new products close up in a calm and relaxed environment.

The first fixtures in the revolutionary Robin series are the Robin 3 Plasma Spot, the Robin 300E Spot & the Robin 300E Wash.

Robe continues it's drive to be at the forefront of technical innovation with these fixtures, which are designed to maximize the amazing features, functionality and opportunities offered by the new Lifi Plasma lamp and the Philips MSD Gold 300/2 MiniFastFit lamp.

Fantastic results are achieved in the colour rendering output using plasma lamp technology, whilst the punchy output of the Philips lamp is multiplied by a unique Hot-or-Not-spot reflector solution allowing remote hot-spot control. (patent pending)

#### The Robin® 3 Plasma Spot

The Robin 3 Plasma Spot is the first in a new generation of fixtures, coming complete with the features of every designer's dreams – An extreme light output of 18,000 Lumens, a perfect colour rendering index (94), an extremely flat and even light beam (1 : 1) and a lifespan of 10,000 hours.

These are all made possible by the fantastic new plasma lamp light source – which is just being introduced to the market. The Robin® 3 Plasma Spot™ also offers a 20 – 100% dimming capability and a semi-hot re-strike facility of less than a 20th of a second for the full lamp brightness to be restored after shutting off.

There is an exceptional optical efficiency of 54% and a lamp luminous flux of 22,000 Lumens, giving the fixture an incredible output of 10,000 Lumens – never previously achieved from a 266W light source!

#### Robin® 300E Spot

The Robin® 300E Spot™ has a series of specially designed modular features including a large 10° – 40° zoom, CMY+CTO, static and rotating gobo wheels, colour wheel, frost, iris and many more.

This is a neat, punchy profile fixture with superior functions like the large linear zoom and dynamic hot-spot control, making it ideal for a wide range of applications. It comes with a full package of rotating and static gobos plus full CMY+CTO. The colour wheels have been developed to give a standard 'building block' base for any show, and advanced features like variable frost, linear iris, rotating prism and speedy mechanical shutters provide subtle and detailed fine-tuning.

#### Robin® 300E Wash

The Robin 300E Wash is a flexible, lightweight, silent unit with an extremely wide zoom of 5° – 45°. The compact dimensions make it easy to conceal whilst providing an efficient wash effect able to achieve the gentlest of pastels to the richest of saturated colours.

The enhanced CMY+CTO system mixes real colour correction quickly and accurately. The 7+1 colour wheel with its easily replaceable magnetic positions can spin funky rainbow effects at both high and low speeds. The new innovative remote hot-spot control combined with an extremely fast iris delivers the maximum lumen output at any beam angle from 5°- 45° – another incredible feature that is unique to this fixture.

### **REDMix 2•188 Outdoor™**

Robe's new REDMix 2•188 Outdoor is the most powerful outdoor LED fixture currently available, with 188 High Power Luxeon K2 RGBW LEDs! The LEDs are densely populated, providing an extremely bright light output and the unit is completely silent due to the convection cooling. It has an IP 65 rating and can therefore be used for exterior installations, and is ideal for illuminating and washing large buildings and indoor/outdoor stages. The unique combination of RGBW LED colours delivers a pure and proper white – a feature as yet unseen in competitive products.

### **Also**

Robe's DigitalSpot 7000 and 3000 DT digital moving lights will also be prominent on the stand, along with their REDWash LED wash lights, and a new version of the ColorSpot 2500E AT incorporating a super-bright enhanced 1500W bulb.
