

Robert Juliat's Tibo HE 553

Posted on July 1, 2021

TIBO HE 553 *NEW HIGH* *EFFICIENCY PROFILE*

Robert Juliat's Tibo HE 553 is a mighty compact profile featuring a high-efficiency 115 W white

LED engine.

The LED source delivers a very high CRI and guarantees a quality white light. The warm white version offers a light output that far exceeds 1000 W tungsten luminaires and nearly matches that of 1200 W tungsten models. The cool white version guarantees a light output surpassing a 2500 W tungsten profile spot equipped with CTB filter.

Tibo HE has an integrated power supply that makes it really compact and even aesthetically pleasing and easier to incorporate into a design vision. Its versatile optical design is a legacy from the original Tibo 533 model and remains unchanged. It still offers two different zoom ranges in one single unit - from 15/35° to 30/45° - which makes Tibo HE fitting into any application, from architectural to event applications as well as traditional entertainment lighting.

- Available in warm white 3000K (98) or cool white 5700K (93)
- Coated double condenser optics
- Two different zoom ranges in one single unit: 30°/45° or 15°/35°
- Built-in electronic flicker-free power supply
- Silent operation
- M-size, glass and metal gobos
- Compatible with DMX, RDM, Art-Net, sACN protocols
- All parameters can be adjusted by RDM protocol or web interface
