

Robin Hood and the LEDWash 800s

Posted on February 3, 2017

The Joburg Theatre have invested in seven more Robin LEDWash 800s to supplement their existing stock

and which have been the workhorses on productions like *Robin Hood and the Babes in the Wood*, the brand-new pantomime adventure from Janice Honyeman which ran until the 30th December 2016.

“We chose the Robin LEDWash 800s two years ago because of their popularity amongst visiting companies,” said Enos Ramoroko, Technical Manager at the Joburg Theatre. “The lamp shaper is quite handy for theatre, and we have received positive feedback from lighting designers who love their output and colour mixing.”

While the Robin LEDWash 800s were a hit on *Robin Hood and the Babes in the Wood*, they have been used on all shows performed at the Mandela Stage over the past year with highlights including *Supreme Divas* and *Burn the Floor*, the ultimate ballroom sensation.
