

Robins for Paul van Dyk

Posted on March 22, 2012

22 March 2012

All the way from Germany, Paul van Dyk opened up his Johannesburg (South Africa) set of his Gatecrasher World Wide Tour at Truth Nightclub in Midrand on 3 February 2012.

XGX Productions, commissioned by Vic Vaid and Lee Govender, were the technical suppliers of sound, lighting, audio visual, structure and special effects.

The lighting design was by XGX's Gert Smit, who had free reign to create something special for the up-beat young audience. Colleague Martin Vermeulen took care of the programming on their Avolites Tiger Touch console.

XGX had recently purchased Robin 300s, and were pleased with the fixtures. "It was very nice to work with the Robin 300s," commented Gert Smit. "They worked perfectly as both a colourwash and made great eye-candy for the massive crowd. To round off the sensational event we added 4 x CO2 Canons, 4 x Green Lasers and 1 x Colour Laser."

The event ran without a hitch and from start to finish the XGX team enjoyed the event as much as the audience. Gatecrashers were impressed with the high quality and professionalism of South African productions and hope to work alongside XGS on future events.
