

Robotic solution at Prolyte!

Robotic solution at Prolyte!

Posted on January 10, 2023

Prolyte has announced the introduction of its first robotic production line, Robotic welding, which certainly brings many benefits to the table.

Robotic welding benefits include:

- Consistent quality
- Improvement on production
- Same strength as current H30V
- MIG welding
- Safety
- Optimization of processes

Robotic solution at Prolyte!

- Stronger at critical points during load in/out and transport
- Increased capacity
