The proof is in the pudding and MJ Event Gear were delighted to receive a thumbs up from their client, Idealistic, for once again pulling off a fantastic Tarsus Dealer Bash. The event was held at Montecasino and MJ supplied the ground support and full technical.

Tarsus distributes the world's leading IT hardware brands to the Southern African reseller channels. Every year they host a special party occasion, this year it was a live outdoor concert with performances by Lonehill Estate and Shannon Ellinas better known as the Drum Machine.

The MJ crew

erected a 10m x 8m Prolyte Ground Support with roof. The lighting gear rocked and included, amongst others, Robin 300 Spots and Washes. Lighting designer, Johnny Scholtz programmed and operated on a grandMA full size.

Commented the client, Idea-Listic, "To the team at MJ Event Gear, your professionalism, ability and service over the past years have way exceeded our expectations. Such a commitment to great service is to be commended."

Lighting
