

Showline at Prolight + Sound

SL Band **Germany** – Frankfurt Prolight + Sound will see

Philips Entertainment lighting's recently-launched brand, Showline, exhibit five of its powerful, already in demand, new luminaires designed specifically for the entertainment and touring market.

The vibrant range of luminaires can be found in Hall 11, Stand D73 and includes Philips Showline's 4-foot SL BAR 640 and 6-foot SL BAR 660 linear wash luminaires. Both deliver exceptional light output and can be used as a wash or as a direct-view linear bar.

Joining them will be the SL BAR 520 – a two-foot RGBW linear wash luminaire that produces over 8000 lumens of output with six standard 8° lenses. In addition high-resolution pixel mapping control and a unique locking system that allows the luminaire to be tilted vertically and horizontally while retaining perfectly even pixel mapping.

SL BAR 520

Also on stand the SL PAR 150 ZOOM – an LED Par with a manually adjusted beam angle of 15°-70° and utilizing nine homogenized RGBW LEDs to produce over 3200 lumens of output. It features a dual-purpose yoke

that can be used to hang the fixture or as a versatile floor stand.

Launching at Prolight+ Sound, the extra rugged, compact, 4-in-1 RGBW LED SL BAND 310, offers exceptional light output and incredible color definition at a stunningly bright 2400 lumens of output and 23° beam angle. The fixture can be used for projecting on a surface or illuminating an audience. No external supplies or cables are required.

All of these Showline luminaires feature Harmonize Color Calibration, intuitive LCD menu system, stand-alone abilities, RDM capabilities and other standard features. Additionally a totally new Showline product with unprecedented output and capabilities will be revealed at the Prolight + Sound show.

“Showline is an exciting addition to the Philips family,” said Brad Schiller, Showline product marketing manager. “In the development of the complete product family, we have taken our time to ensure that all Showline products integrate into a seamless package of useful and reliable LED luminaires. For example, all Showline products utilise homogenized RGBW LEDs, built in effects, color calibration, and many more features never before offered on LED luminaires. So whether used in wash or a direct-view application, Showline luminaires will add to any production.”

Prolight + Sound will be taking place at the Messe exhibition centre in Frankfurt from 10-13 April in Hall 11, stand no D73.
