

Solutions for tomorrow: MA Lighting at Prolight + Sound 2016

At this year's Prolight and Sound Frankfurt exhibition MA Lighting dedicates a whole booth to its dot2 lighting control solution and features new software release version 1.2, driving the success story of MA newest product range. Multiple hands-on dot2 console stations will be available for users to familiarise themselves with the new software. MA's product specialist will be available to answer questions or guide you through the latest feature set. Software version 1.2 adds lots of detail with respect to the overall workflow and makes the user experience even more intuitive. Customizable layout views, multi-patch for fixtures including dot2 3D, assignable DMX ports, Auto-Backup functionality, Effect Markers, Effect improvements and lots of other enhancements are now included. Come along and see the latest additions for yourself.

Intuitive operation is the core of the dot2 philosophy and with a comprehensive set of connectivity hardware on all console models, the dot2 range is suitable for most theatre, touring, corporate, television and education lighting environments. The easy to operate dot2 software is available in multiple languages and provides on board Help and Direct Hints to guide a new user to operate the console to its full potential. A full range of clever programming and playback features provide intuitive access to advanced functionality. All information about the dot2 range can be found at the dot2 website: www.ma-dot2.com

Another adjacent booth of MA Lighting is dedicated to MA's flag-ship lighting control range; grandMA2. A pre-release of the upcoming software candidate version 3.2 will be on display. Main features are RDM with MA Nodes, Bitmap Effects, Internal Timecode Generator, full implementation of Web Remote, Workflow Improvements, MA 3D improvements, MA Network Switch integration as well as a full new Codec implementation for the MA VPU and new Pixelmapper Playback Priorities.

Another highlight this year will be the brand new MA Network Switch, which radically reduces the setup time and the level of complexity to achieve an optimised lighting network. In combination with the MA consoles and additional MA networking devices the MA Network Switch provides a very easy to use solution, even for complex lighting systems, incorporating the hardware and software stability MA Lighting is famous for. MA Lighting's team of product specialists will be on site to answer all questions and to show all of MA's system components in depth.

Company Profile

As master distributor MA Lighting International is responsible for worldwide sales and marketing of the renowned MA control systems, digital dimming systems, networking tools and media servers. The product range offers cutting-edge solutions for control and dimming, including the award-winning grandMA2 consoles, the MA onPC command wing and MA onPC fader wing, the extremely intuitive and compact dot2 range and reliable digital dimmer racks and packs. With its innovative MA VPU (Video Processing Unit) MA bridges the lighting and video worlds.

Today, MA Lighting is respected for its technical knowledge and has achieved a unique international reputation for its operational philosophy. The company offers several decades of experience and strictly follows a professional user-centric approach, getting as close as possible to the market via its own international offices and support centres in the UK, North America, Latin America, the Middle East/India, Asia Pacific and Scandinavia/Eastern Europe/Russia – supported by a world-wide distribution and service network.
