

Transnet with MJ

Posted on December 13, 2013

Fresh look for Transnet breakfast

For the third consecutive year, MJ Event Gear supplied the full technical including sound, lighting video and set elements, for Transnet's annual breakfast and media briefing hosted at the Hilton Hotel, Sandton. The event, which took place earlier in 2013, was identified with a fresh, crisp look.

It was a pleasure for Theo Rood from MJ Event Gear to work alongside his client Benjamin Joannou

from Overend Outsource.

While Transnet executives arrived as early as 5am for a private conference, the main event for invited guests and media, took place a couple of hours later. The main venue was set up cinema style with the focus on a stage and large 8 x 4m LED screen.

“The client’s only request was to include a video clip of a heartbeat, running in a chase format, onto the LED screen as guests entered the room,” explained Rood.

Lighting included 12 x Robin 100 LEDBeams, 8 x Robin 600 LEDWash, 4 x Robe MMX Spots and 24 x Pixel Pars. The show ran off a grandMA full size.

In and around the foyer 24 x LED Parcans were used for up lighting and four Robe DigiSpots to project and rotate the Transnet logo.

MJ use Robe on Transnet event

Well done Theo Rood and your team!
