Built Tough, Ultra-Safe

High Strength

Fast Maintenance

Copyright © DWR Distribution

Whole Cabinet Front Maintenance

The vacuum maintenance tool supports the front maintenance of the whole cabinet. The disassembly and assembly are smooth and easy to operate.

Efficient Heat Dissipation

Copyright © DWR Distribution

Rear Cover Ventilation Hole Design

Air convection enhances cooling efficiency by increasing the passive heat dissipation area by 10%, resulting in a temperature reduction of approximately 5°C compared to similar products.

Fast Installation

Magnetic Installation

Installation efficiency increased by 3 times, easy to build a large screen, simple and efficient operation

Highly Integrated Design

3-in-1 Integration

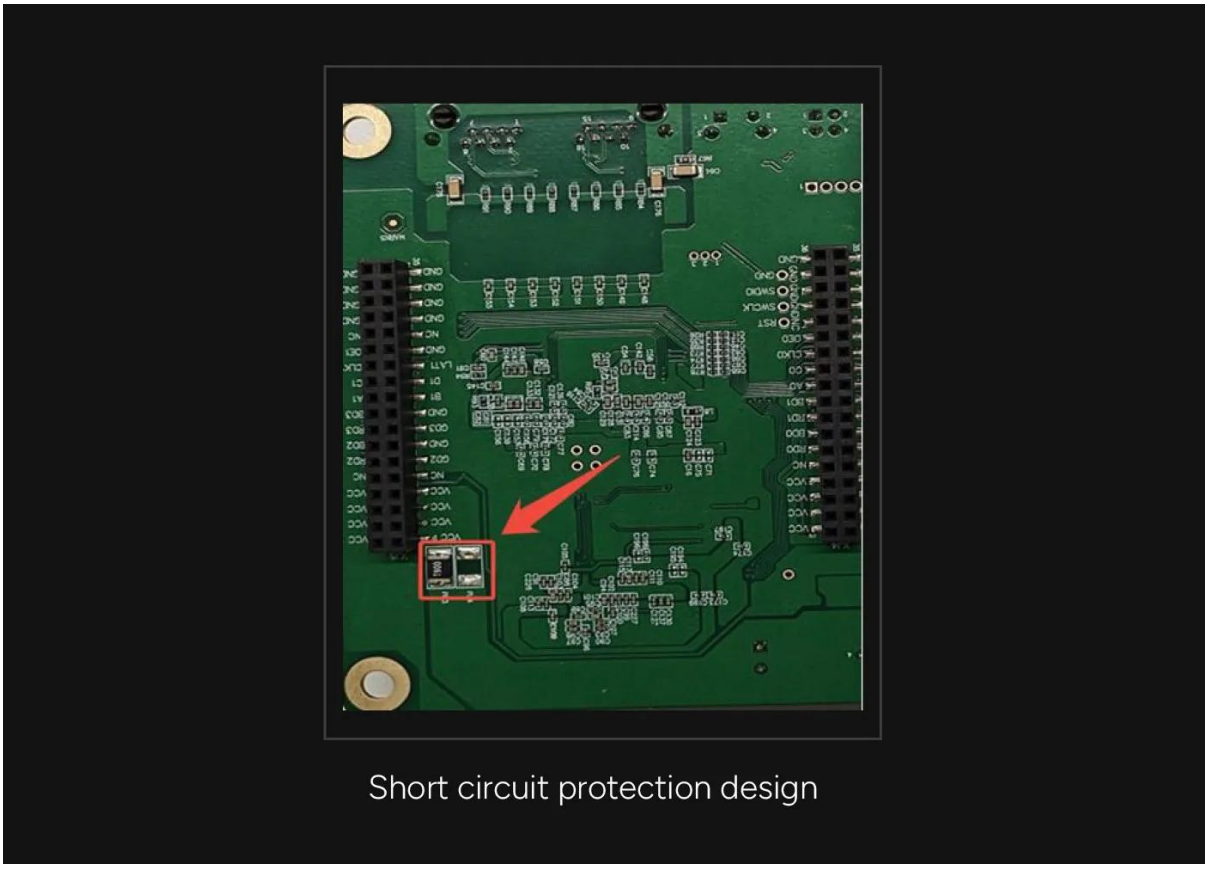

Cable-less inside the cabinet

Modular design, no wire interference, more stable

Reduces the cable connection process in production

High Safety Level
