With up to eight precisely tuned drivers in each ear, UE Pro in-ear monitors deliver the pristine audio quality of high-end studio monitors straight to your ears.

UE earphones create a natural seal with your ear to block out 26 decibels of ambient noise, so you can hear clearly anywhere—from the stage to the studio and anywhere in between.
3D-printed from impressions of your unique ear shape, UE Pro in-ear monitors offer a level of personalized comfort that can’t be beat.

All UE models are built to withstand the rigours of touring. Thanks to an IPX-rated waterproof connection system and durable SuperBAX cable, your earphones will stand up to years of daily use, on stage and off.

For decades, musicians of the highest caliber have relied on Ultimate Ears to hear every note on stage. From the Beastie Boys to Iron Maiden to Lady Gaga, Ultimate Ears are now used by the majority of the world’s top touring musicians.
