

## Ultimate Ears for the Stage, Audio and Beyond

Picking the right in-ear monitor is easy. Every custom in-ear monitor will block out -26dB of ambient noise and all models will allow you to hear your mix with detail and clarity. Our suggestion is simple: have your in-ear match your gear & your style.

Every pair of Ultimate Ears contains speakers with up to 16 balanced armature drivers precisely tuned to give you an unmatched audio experience. Choose from 6 models, each engineered to deliver a full compass of sound.

### **UE 5 PRO**

The dual driver UE 5 PRO delivers everything you need in a monitor. Think of this like a small PA system. You have a low driver and a high driver. It is a versatile monitor that will perform well on any position. It gives you everything you need with nothing added.

Ultimate Ears are available in South Africa at DWR Distribution. For more information e-mail [sales@dwrdistribution.co.za](mailto:sales@dwrdistribution.co.za)
