Entertainment Rigging Analysis

Vectorworks Braceworks – The Show Must Go on. Safely.

Braceworks™ add-on module for Vectorworks Spotlight provides design, production, and rigging professionals with an easy way to gauge the performance of temporary structures under load. This one-of-a-kind module helps ensure safety and compliance with engineering codes and standards, creating a completely integrated modeling, analysis, and documentation process in one interface.

Discover peace of mind

Regulatory requirements and increasing requirements from venues, municipalities, and building owners, are making it necessary for event design, A/V, and rigging companies to produce load and structure calculations for sign off by structural engineers. Rest assured, Braceworks is a solution you can trust. It was developed in collaboration with DeerSoft GmbH with input from rigging professionals, venue operators, and event planning firms, so we're confident it will deliver the results you need.

Make Smart Decisions

Vectorworks Braceworks – The Show Must Go on. Safely.

With Braceworks, you can:

- Analyze complete 3D structural systems
- Conduct static analyses and FEM analysis with results that display graphically on the model for easy reference
- Automatically generate detailed calculation reports
- Export files as DSTV to easily share information
