IT'S ALL ABOUT THE PEOPLE

You are invited for an introduction to Vectorworks Spotlight 2021 with Dylan Jones from DWR Distribution on Thursday, 1 October at 14:00. Join us on Zoom.

As entertainment events get more challenging and technology evolves to handle more complex levels of productions, designers demand tools that help solve intricate problems under tight deadlines, tools that aren't just functional, but reliable and fast.

With the reimagined user interface, you'll enjoy a much simpler modelling experience. The new quick search command keeps common tools, modes, views and more right at the point of your cursor. The hoist tool has been reengineered to make designing and detailing your rigging system faster and with fewer clicks. With 2021, you'll be able to directly transfer data and format between Excel and Vectorworks worksheets and it will be much easier to get into the flow with the new smart option display built to keep your favourite tools and commands readily available.

It's all about saving time. The audio visual workflows are no exception. The speaker tool now supports symbols and custom objects which quickens the process designing speaker arrays. Say goodbye to limitations and hello to possibilities and experience first-hand how Vectorworks simplifies the complex and entertainment design.

Date: Thurs, 1 October

Time: 14:00

Cost: Free

Platform: Zoom
