

Waves Audio Now Shipping the Nx Virtual Studio Collection

— Fine-tune your mixes in the world's best studios —

Knoxville, TN, May 16, 2022 — [Waves Audio](#), the world's leading developer of professional audio signal processing and plugins, is now shipping the Waves [Nx Virtual Studio Collection](#). This plugin bundle gives users virtual access to and monitoring systems of world-famous mixing rooms, on any pair of stereo headphones – so you can mix with confidence wherever you are.

From L.A. to New York to Nashville, the Waves Nx Virtual Studio Collection brings together precision acoustic models of world-class studios. Put on your favorite headphones, and enter Ocean Way Nashville, Chris Lord-Alge's Mix LA, GEMA New York (originally The Hit Factory), and the original Waves Nx Virtual Mix Room – so you can perfect your mixes in superior mixing environments.

Now you can make your best decisions about balance, stereo image and panning, mix depth, low-end response, and more. Get reliable perspective as you cross-check your mixes in trustworthy acoustic reference environments, expect to ensure that your work translates properly to all systems.

Each Nx plugin comes complete with several monitoring systems from the original studios, emulating the acoustic models of classics including NS10s, high-end Ocean Way and Exigy monitors, and more—for a total of 4 studios and 12 stereo monitoring systems.

Trusted by tens of thousands of producers and mixing engineers, all Nx plugins are powered by Waves' pioneering technology for immersive spatial audio. Waves Nx uses channel crosstalk, inter-aural delays (ITD), filters (ILD), early reflection motion tracking to replicate the immersive experience of hearing audio in the real world. All these are coupled with precise measurements of the actual studios, to deliver a faithful three-dimensional representation of the original acoustic experience.

Nx Virtual Studio Collection features:

- Stellar acoustic reference for your mixes – on any headphones
- The acoustics and monitoring systems of world-renowned studios
- 4 studios, 12 monitoring systems
