

Welcome to SA, Radim from Robe!

Posted on July 6, 2019

Radim Žlebek is a Product Manager at Robe, and will be manning the Robe stand at this year's Mediatech Africa. We loved his answers.

ROBE

What things do you do every day that you wish could be automated?

That would require a lot of programming since I do very colorful job, I am married and have a child, so every day is routine free.

If you were stranded on an island, and you could choose one person to keep you company, who would it be? What about one animal?

A person would be MacGyver- he knows some tricks, how to make something from nothing in no time.

Welcome to SA, Radim from Robe!

The animal would be a rattlesnake. Why? Because I would love to see what MacGyver creates from the rattle.

Interesting food combinations?

Cooking with wine is very interesting. When I cook, I sometimes put wine into the food too. ☐
