ROBERT JULIAT MEANS:

OPTICAL EXCELLENCE | The Robert Juliat optical system is based upon condenser optics which harness the maximum amount of light to give a flat, even beam with no hotspot and little fall off of light at the edge of the beam. The result is a crisp, consistent spread of light, ensuring a smooth general cover and unsurpassed image projection.

BUILD QUALITY | All fixtures are manufactured to be durable enough to withstand even the toughest of tours whilst each high quality component ensures complete reliability under show conditions.

EASE OF MAINTENANCE | With the technician in mind, Robert Juliat designs fixtures to be the quickest to set up and easiest to maintain.

ERGONOMIC PERFECTION | From the large wrap-around, heat-resistant followspot handle which allows the operator to work from any position preferred, to the thumb-rests on the profile shutter lock enabling single handed operation during set up, each Robert Juliat fixture offers exclusive features to make operation a pleasure.

CUSTOMER CARE | Consultation and consideration are company watchwords. Robert Juliat listens to its customers and consults focus groups of end-users, formulating designs for the ideal product from the point of view of the people who use them. This provides answers for present needs and keeps the company at the front of future developments

VALUE FOR MONEY | Robert Juliat luminaires make financial sense because of the cost savings afforded by the modular nature of its range and the versatility of each zoom fixture. Man-hours and maintenance time are reduced, spares stock levels are kept to a minimum and the quality of build ensures a durable product with a long working life and an exceptional return on investment.
