

LSC

[Visit the LSC website](#)

With a 30-year heritage of designing, manufacturing and distributing leading-edge Lighting Control Products for the entertainment market worldwide, LSC Lighting Systems has developed a highly regarded reputation for innovation, quality and reliability in any of its products it produces. This has been further exemplified by being awarded an “Australian Design Award”, various industry product awards and more recently qualifying for “Product of Australia” status. The company is proud to be 100% Australian owned and continues to control its own destiny by investing in product development and manufacture within its own purpose-built facilities located in the south east of Melbourne.

Since its inception in 1979, LSC has been at the forefront of industry pioneering; being a world leader in the introduction of digital communication with the DMX512 protocol; merging conventional and intelligent lighting control into the one platform; and leading the industry in the introduction of Remote Device Management (RDM) communications.

LSC has an extensive network of distributors and dealers, with outlets on all major continents and direct representation in over 40 countries. The LSC product range is extensive and covers diverse market sectors, such as live performances, traditional theatre, corporate theatre, worship, educational, television, film, exhibition and architectural lighting. Equally, the customer profile for LSC products is quite diverse, encompassing some of the world’s best known Opera Houses and Theatres, major Touring Production companies, National television studios to local community theatres, schools and churches. Where you require good, reliable lighting control for your show – you will find the name LSC.

DWR Distribution have been pleased to work with Pete Floyed over the years, enjoying his great sense of humour and bantering. LSC has been a cost-effective and reliable product to the South African market.
