

Robe Lighting

[Visit the Robe website](#)

Robe Lighting is based in the Czech Republic and manufactures innovative, high quality moving lights and digital lighting products for the professional entertainment & leisure, architectural and themed environment industries.

Robe Lighting – Philosophy

Central to the company philosophy is the practice of working as closely with our business partners and end users as possible, listening to their needs, thoughts and wishes and understanding their markets. Knowing our business is based on numerous individuals and we endeavour to meet as many of them face-to-face as possible. Building the “Robe Family” means that all comments and feedback are welcome.

The Robe brand is currently still experiencing growth in all sectors, and our products can be found on stages, in concert halls and TV studios and illuminating buildings and other structures worldwide. Over 330 employees work at Robe’s primary 20,000 square metre facility in Valašské Meziříčí, and the products are exported via a worldwide distributor network to over 90 countries across all continents.

The administration side of the company is constantly expanding to keep pace with the increases in production. The future is full of ambitious plans and ideas. Robe continues to focus on designing and producing well-engineered products utilising the very latest available technology to meet the creative, technical and practical demands of our wide range of users and investors.

Robe Lighting and DWR Distribution

DWR Distribution have been honoured to represent Robe Lighting in South Africa right from the very start of our company. There are no words for the relationship formed with Josef Valchar and of course Harry von den Stemmen who takes care of us. We see Robe moving into the future with excellence and great products, wonderful support.
